Gynae:	HNA	64	(74%)			
Skin:	HNA	187	(97%)			

Here for you

Treatment Summary

LGI includes:

- side effects that may develop or not resolve within 6 months/ yrs later
- Specific to treatment modality
- general side effects
- alert symptoms

Scale of Issue

15m with a long term condition

50% all GP appointments

75% all bed days

70% acute and primary care budget

Longitudinal impact

	Diagnosis & treatment	Post treatment
Breast	48,000	448,000
Colorectal	40,000	197,000
Prostate	29,000	215,000

Yip et al 2015

Prevalence of long term consequences

500,000	poor health or disability
350,000	chronic fatigue
350,000	sexual difficulties
240,000	mental health problems
200,000	moderate to severe pain
150,000	urinary problems
90,000	GI problems
63,000	Lymphoedema

Macmillan 2013

Survivorship is not “one size fits all”

Only 45% said received enough care or support from health and social services post treatment (NCPES 2015).

Key themes were “Moving on” (leaving cancer behind),
“See the world differently” (transformation),
“life will never be the same” (cancer always there),
“One day at a time” (ongoing symptoms),
“Losing myself” (negative transformation/ loss of identity).

(Martin et al 2015)

What we can offer to support

ANP/ CNS
assessment
and advice

Macmillan Support Officers

The Macmillan Support Officers are a first point of contact for patients on self-management programmes, and assist with the delivery of the recovery package. They are also available to health and social care professionals who may have queries in relation to Croydon patients who are living with and beyond cancer or advice on access to other available services.

Breast

Michelle Tutt

Macmillan Breast Cancer Patient Support Officer

020 8401 3000 ext.3652

Colorectal

Thomas Lewis
